## Simple Scheme for products, quantity and price manipulation

## Admin Panel for Product Management for Shopy2Go

This is descriptive User flow of the process for Shopy2Go Admin Panel which will provide to the eStore owners manage of their data into the stores.

The eStore owner has to go to the WEB Link: <http://www.ibuywesell.com/store/auth/login.php>  
After login to the Admin Panel will be present the main screen (Dashboard)!

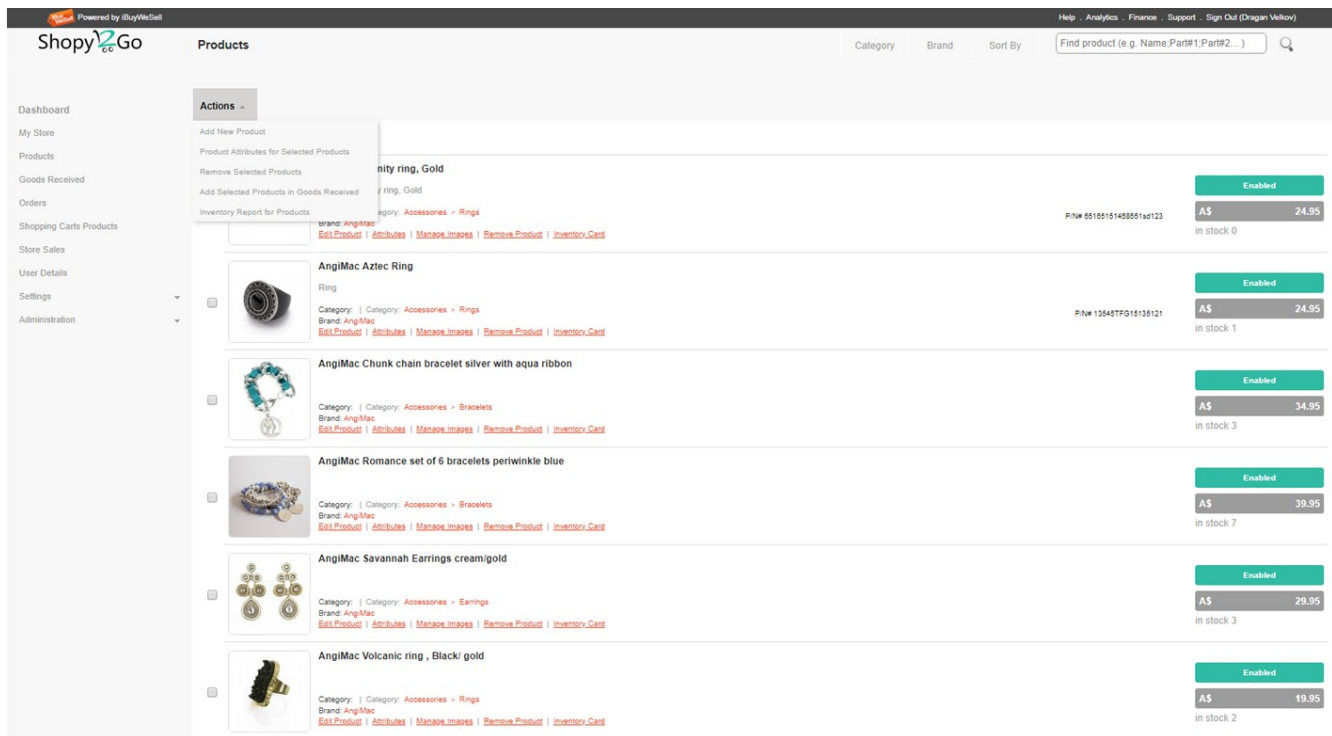

## DASHBOARD PAGE

This is the home page of the Admin Panel for eStore owners. These are the Dashboard elements which are present:

- Logo of the Store
- Title of the page
- Action Menu with menu options
  - **My Store** - User will be redirected to his eStore page to preview.
  - **Products** - This option is for manipulation with the Products (List, Search/Filter, Add/Edit/Remove, Report, Enable/Disable)
  - **Goods Received.** - This option will redirect the user to the Goods Received Page where are listed by number.
  - **Orders** - This option will redirect the user to the Order Page and review list of all orders.
  - **Shopping Carts Products** - This option gives an opportunity to preview/remove the Ordered Products which are in Users Shopping Carts and also to manipulate with Pre Order Products (Send email for confirmation, cancelation of the Products etc.).
  - **Store Sales** - This option gives an opportunity to sell products directly from the physical store for clients which don't have mobile application to do purchase.
  - **User details** - This Option is to review (Sort/Group/Filter) User details by key elements.
    - **Purchase History** - This option is for review the Purchasing Histories of each separate Users and also can be filtered by some date period.
  - **Settings** - This option consist sub option like:
    - **Shipping Options** - This option is to manage (Add/Modify/Delete) shipping options
    - **Price Range (for iOS)** – This option is to set price ranges which is using only in iOS version of Shopy2Go.
    - **Brands** - This option is to manage (Add/Modify/Delete) the Brands.
    - **Categories** - This option is to manage (Add/Modify/Delete) the Categories.
    - **Product Attributes** - This option is to manage (Add/Modify/Delete) the Product Attributes.
    - **Notification Center** - This option will redirect the user to the Notification Center Page
    - **General Store Information** - This option is to review and modify some General Store Information details.
  - **Administrations** - This option consist sub option like:
    - **Action Log Report** - This option is for review all Actions from Administrators work.
    - **Manage Accounts** - This option is for manage the Administrators and their Access levels.
    - **Change Password** - This is the option where Every User can change their password.

## MANAGE PRODUCTS PAGE

On this page we will have next elements:

- Logo of the Store
- Elements for searching, refine and sorting for the products of the eStore for filtering the data (Category, Brand, Sort By and Find Product)
- Find Product search box can be used as combination of part of name or part of product Number separated by coma separate char “;”.

E.g. User like to list all product which have “orange” in title or description and also to include in the list some products with full #number or just part of the #number. How this it will look like?

This will return list of all products which consist word Orange and also include all products which have (consist) #number 123456 or 455. (Note: If part number was added full number, the system will return that particular product, otherwise if part number is partial, then system will return all products which started with that partial number.) As soon as more details are added the result will be more precise.

- Analytics - This link will open new tab and will redirect to the analytics site which we are using for ecommerce app (Localytics). User must login and can review all statistics about his application.
- Finance – This link will open new tab and will redirect to the Braintree site which we are using as Payment Gateway. User must login and can review all financial reports about purchased products.
- Title of the page
- Action Menu with menu options
  - **Add new product** - This option will open the page for adding new Product as an entity.

**Notes:**

- Min QTY is the min of quantity which each entity should have always in stock. If some product will have less then this number then this product will be listed in the Products with critical qty in the Dashboard.
- The purpose of the Public/Private field is to allow system to present (not present) some product on the WEB eStore page. If the product was set as Public will be visible everywhere including in Shopy2Go app, but if is set as private, then can be available only on Shopy2Go and not on IBWS WEB page.
- The purpose for Pre Order Allowed/Disallowed filed is to set if the current product it will be available for Pre Order or not, which means when client like to purchase some product which is not allowed for Pre Order the system will not present the Pre Order box in the application and will inform client that this product is Out of Stock.

## SHIPPING CARTS PRODUCTS

Product Title	P/N#	QTY	Price (A\$)	SubTotal (A\$)	Date	Days In Cart	PreOrder	User	Delivery Days	Confirmation Email	Remove From Cart	Note
Butter London Hydrating Hell Balm Stiletto Stick		1	39.95	39.95	19/12/2016	43		Dragan Velkov			Remove	
Butter London 3 Free Jacques Dilly		2	22.00	44.00	18/12/2016	44	✓	Dragan Velkov		Send	Cancel	
AnqiMac Cheetah Ring		1	14.95	14.95	10/12/2016	52		Dragan Velkov			Remove	Reminder sent 43 day(s)

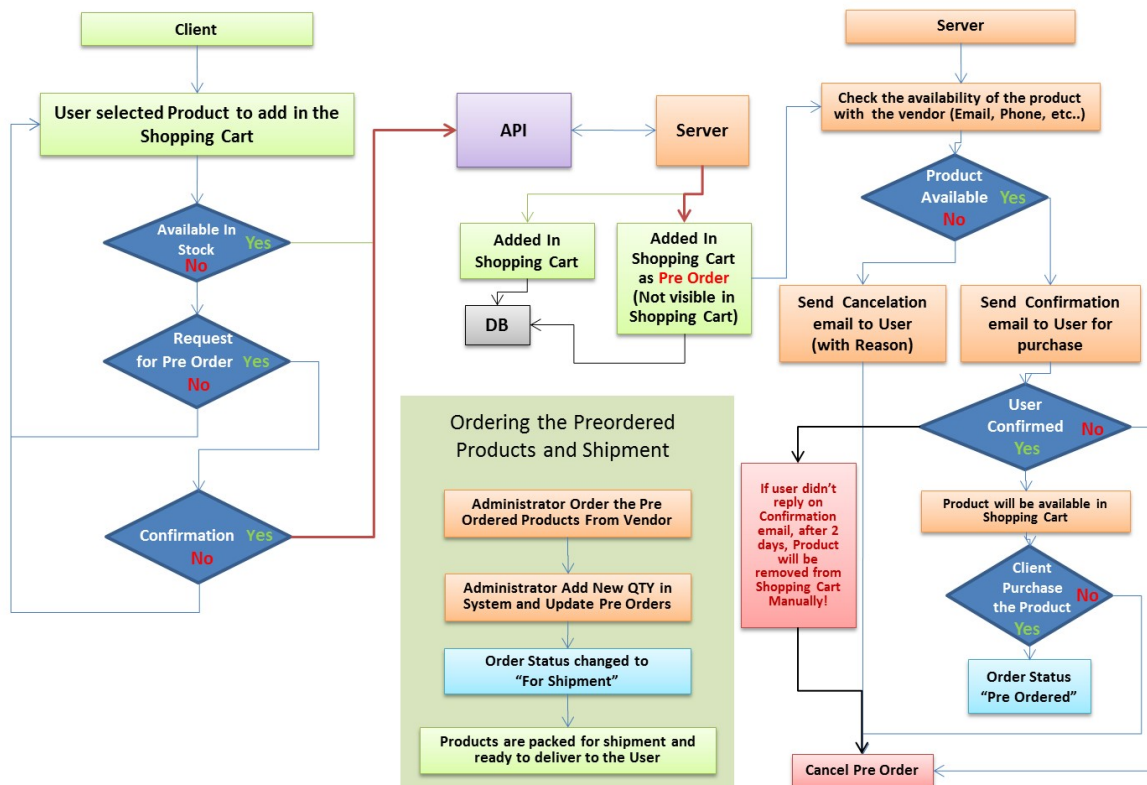

On this page we will have next elements:

- Logo of the Store
- Title of the page
- Action menu with menu option:
  - All Products
  - Pre Ordered Products
  - Cart Products.
- Body of this sheet has list of products with elements:
  - On the top position is option to send reminders to the Clients that they have some products in their shopping carts. User can add the number of days for that process.
  - In the next line are the combo boxes for select Date Period, Product and User.
  - List of all products which are at the moment in the Clients Shopping Carts with option to click on Product and to see details or direct email the User.
  - The regular process can be removed if the client even after reminder didn't remove the QTY from the Shopping Cart.
  - The whole process of manage the Pre Order is presented on the diagram below, but shortly it should work on this way:
    - a. Admin needs to review and check the availability of Pre Ordered products from the Vendor and in the box for "Delivery Days" Admin needs to add how many days will needs to get the product from the vendor and that number will be added into the Confirmation email. Then can send the confirmation email to the Client.
    - b. When User will receive the Confirmation email, he has choice to Confirm/Cancel the order. If he confirmed the order then this Pre Ordered product will appear into his Shopping Cart and he can be able to do regular purchase of the product. If he didn't confirmed or cancelled this pre order after some days Admin can be cancelled from the shopping cart.
    - c. When Admin will cancel the Pre Order he is able to add note with reason for cancelation.

### Pre Order Scenario

1. User will click on client app for add to shopping cart some product which is out of stock.
2. Client side will popup box with notification that is out of stock and option to close the window or to do Pre Order.
3. If User select preorder, then system will add in the shopping cart, but will not be available for purchase.
4. Administrator will review the Pre Orders and will decide for each separately. Can call and talk to the vendor to check the availability of particular products and if is available to get info when can be shipped to him. That information can be added into the purchase receipt (and confirmation email) later when user will be contacted and asked if is still interested for that product, with sending email to user for confirmation including link for confirmation “Order” of that product and note when this product could be expected to arrive. In the same email will be added another link if user like to Cancel Pre Order. This link will remove the product from Shopping Cart List.
5. If user ignores this confirmation email then the product will be removed from the Pre Order List (Shopping cart), this note will be into the same confirmation email.
6. After confirmation, product will be available (Visible) in the Shopping Cart and User can purchase the product. When process will be completed, system will send regular purchase receipt email (including note for shipment days) and Order will have status “Pre Ordered”.
7. Note: In case if user confirmed and later decide to not purchase the product he can remove product from Shopping Cart and process will be finished W/O placing an order.
8. When Owner (Admin) will see in the Dashboard or In the Order Page Orders with status “Pre Ordered” then he is ready to order those products from the vendor.
9. After receiving new QTY of Pre Ordered products, Administrator will create New goods received document and add new QTY and products. When this is finished, User will click on button “Update Pre Orders”, system will check all products (orders) with “Pre Ordered” Status and for those Orders will change Status with “For Shipment” status. This will be present to the Dashboard as well, and Admin will know that some preorders are ready for packing and shipping.
10. The Order with status “For Shipment”, admin can process them immediately and change later the status with “Shipped”. Notification email will be sent accordingly to inform user that the product is on the way.

Pre Order Scenario Diagram

## STORE SALES

	Quantity	Price	Sub Total	In Stock
 Nesti Dante Of Florence Sardegna Soap	1	A\$ 12.95	A\$ 12.95	3
 Simpatico Fern Hobnail 80hr Candle	1	A\$ 49.95	A\$ 49.95	3

On this page we will have next elements:

- Logo of the Store
- Title of the page
- Action menu with menu option
  - **Remove selected products-** Deleting of products selected for Sale
- Body of this sheet has list of products with elements:
  - List of products selected for Sale.
  - Text box for Find Product: Into this text box user need to type name, P/N# or (part of the name or P/N#) to open autocomplete list with the products which are matched the typed text.
  - Combo box to selected payment option (Cash, Credit card, Other)
  - Find User text Box where Admin can search for User if he is already member of the Store and on that way that purchase order will be assigned to his ID and it User will get all details of that purchase in his Purchase History, including purchase email confirmation.
  - If the User is not member and is not using the Mob App at all, then Admin can ask him if he likes to be member of the store and he could add his details (email and Name) and automatically this user will be created into the DB. Next time if he installs the App he will see all previous purchases and can continue to buy from Mobile Application as well.
  - Otherwise, system will assign this purchase to the store default email or any email which will be Selected/Created by Admin. It depends of the Store how they like to organize this process.

**Note: The suggestion is to use company email and later the Administrators will know which purchase was made physically from the store (i.e storepurchase@estoredomain.com).**

- Checkout Button will start the purchase process.

- Title of the page, Text boxes for add/edit name of the brand.
- Action Menu with option for remove selected brands.
- For each particular brand is one clickable link "Edit"

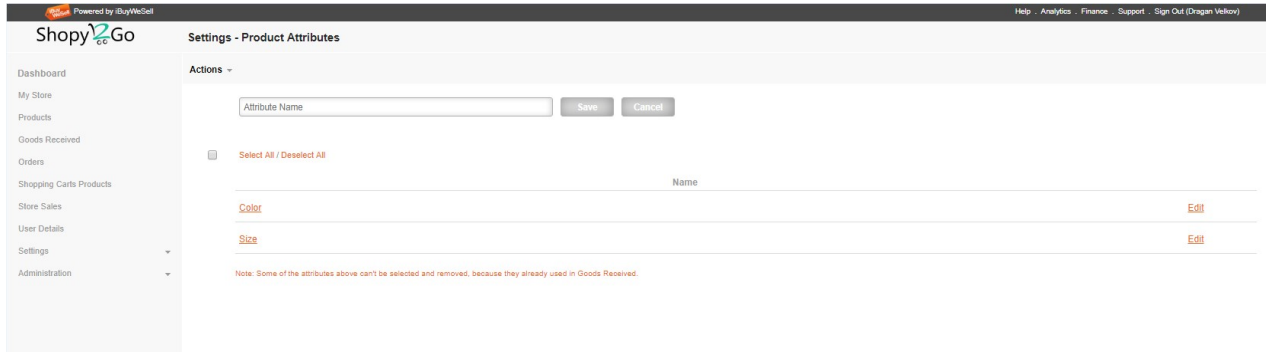

## CATEGORIES

The image displays two screenshots of the 'Settings - Categories' page in the Shopy<sup>2</sup>Go application. Both screenshots show a sidebar menu on the left with options like Dashboard, My Store, Products, Goods Received, Orders, Shopping Carts Products, Store Sales, User Details, Settings (expanded), Shipping Options, Price Range (for iOS), Brands, Categories (highlighted), Product Attributes, Notification Center, General Store Information, and Administration. The main content area is titled 'Settings - Categories' and includes a 'Create New' button, a 'Store category' dropdown set to 'Make-Up', and 'Edit' and 'Remove' buttons. Below this, there are two forms: 'Create New Category' and 'Update Category'. The 'Create New Category' form has fields for 'Category name', 'Parent store category' (dropdown), 'IBuyWeSell category' (dropdown), and 'Display order' (dropdown). The 'Update Category' form has the same fields, but with pre-filled values: 'Make-Up' for Category name, 'Women' for IBuyWeSell category, and 'Skincare' for Display order. Both forms have 'Save' and 'Cancel' buttons at the bottom.

On this page we will have next elements:

- Logo of the Store
- Title of the page, Text boxes for Create New/Update Categories. User need to select and MAP also the IBWS categories which will correspond to the eStore categories. The last text box, Display Order is to setup position where the current Category/Subcategory will be positioned in the category Tree.

## PRODUCT ATTRIBUTES
